Mobile: +91-6386419464

EDUCATION

- Chandigarh University
 - Bachelor of Engineering - Computerscience; GPA:6.43
 - Courses: Operating Systems, Data Structures, Design Analysis Of Algorithms, Computer Networks, Machine Learning , Databases
- Punjab, India
July 2022 - June 2026

SKILLS SUMMARY

- Languages: Java, HTML, CSS, JavaScript, C++, SQL
- Frameworks: Node.js, Express.js, React.js, MongoDB
- Tools: Postman , Github , remix , Photoshop
- Platforms: Web, Windows, Arduino
- Soft Skills: Leadership, Event Management, Writing, Public Speaking

EXPERIENCE

- METACRAFTERS
 - Summer Trainee – Web3 Development
 - Blockchain Development: Developed and deployed multiple smart contracts on Ethereum using Solidity. Utilized Hardhat for testing and debugging.
 - Decentralized Application (DApp): Built a DApp with React.js and Web3.js, integrating MetaMask for transactions, improving gas efficiency by 25%.
 - NFT and Tokenization: Created an ERC-20 token and a basic NFT marketplace using Solidity and IPFS for decentralized storage.
 - Security and Optimization: Enacted security best practices to prevent vulnerabilities like reentrancy attacks and optimized gas fees.
- Remote
June 2024 - July 2024

PROJECTS

- Spotify Clone: Developed an engaging and responsive music streaming web application inspired by Spotify, utilizing HTML, CSS, and JavaScript. Implemented functionalities including play/pause options, a seek bar, playlist management, and an interactive user interface. Employed local storage to maintain user preferences and track history. Improved performance to ensure smooth playback across various devices while enhancing JavaScript skills through DOM manipulation and event-driven coding.
- MERN Notes App: Designed a comprehensive note-taking application using the MERN stack (MongoDB, Express.js, React.js, and Node.js). Designed a RESTful API to facilitate CRUD operations, integrated JWT-based authentication, and managed user sessions through cookies. Created a responsive frontend with React.js and ensured data persistence with MongoDB.
- Post Making Web Application: Engineered a robust and scalable web platform for creating and managing posts, utilizing HTML, CSS, JavaScript, Node.js, and Express.js. Established strong authentication mechanisms with JWT tokens and encrypted passwords using bcrypt. Instituted cookie-based session management while enforcing stringent access controls for data protection. Crafted a responsive and engaging user interface to enhance the user experience and optimized backend performance for scalability.
- Mouse Control using Hand Gestures: Built a hands-free mouse control system powered by AI, using Python, OpenCV, and MediaPipe. Administered real-time hand tracking, gesture-based commands, and predictive algorithms for intuitive cursor navigation, clicking, and scrolling. Achieved 90% accuracy in gesture recognition through deep learning models. Constructed a versatile user interface for gesture calibration and customization, with potential applications in accessibility solutions and hands-free interactions.

CERTIFICATIONS

- Multi-Core Computer Architecture: Certified by NPTEL (Oct 2023) with an in-depth understanding of multi-core processors and parallel computing concepts.
- NPTEL Cloud Computing: NPTEL (Apr 2024) certification covering cloud service models, virtualization, and deployment strategies.
- Internet of Things: NPTEL (Dec 2024) certification focusing on IoT architecture, communication protocols, and real-world applications.
- SQL and Database for Data Science: Coursera (2024) certification on SQL fundamentals, data manipulation, and query optimization for data science applications.
- Introduction to Relational Databases: Meta, Coursera (2024) certification covering relational database principles, normalization, and schema design.
- Introduction to Databases: Meta, Coursera (2024) certification covering foundational database concepts, SQL commands, and database management.
